

- HellermannTyton is a global manufacturer of network cabling solutions for commercial and residential applications.
- HellermannTyton was founded in the United States in 1969.
- HellermannTyton's worldwide team is committed to developing products which lead the industry in performance and design, such as the RapidNet™ pre-terminated network cabling system.

- The RapidNet™ pre-terminated network cabling system is a new high-performance system which utilizes proprietary bundled cables terminated to patented cassettes. Since it does not require on-site termination or certification testing and it utilizes a patented “plug and play” design, installation time is reduced drastically—by 75% or more.
- The GigaBand® Category 6 and MegaBand® Category 5e structured cabling systems include jacks, patch panels, and patch cords. Independently tested, GigaBand and MegaBand perform at substantially above standards.

- The Network Sciences® program from HellermannTyton integrates the company's connectivity products and support programs to provide the components necessary for high quality and reliable structured cabling installations.
- As part of the Network Sciences program, 25-year System Warranties and Lifetime Product Warranties are available.
- HellermannTyton's residential line of structured cabling solutions, Home Network Sciences®, offers all of the components needed to efficiently network a home, small office-home office (SOHO), or residential dwelling.

- Offering a complete solution, other HellermannTyton telecommunications products include: InfoStream® and TSR surface raceways; fiber protection and closure systems; wire managers, racks, and shelves; hook and loop and plastic cable ties; and a wide variety of identification systems which help installers meet the ANSI/TIA/EIA-606-A standard for labeling.

- HellermannTyton's website can be found at www.hellermann.tyton.com. Also, HellermannTyton's online library of telecommunications products can be found at www.myhtnetwork.com.
- HellermannTyton is a TS16949, ISO 9001:2000, and ISO 14001 registered company.
