

HellermannTyton

Approved Cables for GigaBand Category 6 and MegaBand Category 5e System

March 2011

HellermannTyton offers a 25 year warranty on the system installation of recommended cable manufacturer's product and HellermannTyton Category 6 and 5e connectivity products. This assures installation dependability for maximum performance. The **Structured Cabling System Warranty** covers the entire system, including HellermannTyton connectivity products, and beyond, by completing the channel with the recommended Category 6 and Category 5e cable.

HellermannTyton recommends the use of the following manufacturer's cable to be used with HellermannTyton's line of Category 6 and Category 5e connectivity products. These cables have been tested with our connectivity hardware and exceed the latest requirements for Category 6 and Category 5e Link and Channel as specified in the TIA/EIA-568-C.
